FERNANDO DE JESÚS MENDÍVIL TERMINEL

DEVOPS & CLOUD ENGINEER | INFRASTRUCTURE AUTOMATION | SOFTWARE ENGINEERING

Sonora, Mexico | fermendivilt@gmail.com | GitHub | LinkedIn | Credly

PROFESSIONAL SUMMARY

DevOps and Cloud Engineer with a software engineering background and experience automating cloud operations and infrastructure across AWS and Azure. Skilled in Terraform-based Infrastructure as Code, CI/CD workflows, containerization, monitoring, and secure cloud integrations. Contributed to centralized AWS monitoring automation that improved detection effectiveness by 55%, and delivered cloud-based AI solutions using Azure. Brings hands-on application development experience with .NET, Java/Spring Boot, React, and REST APIs.

TECHNICAL SKILLS

Cloud Platforms	AWS (CloudWatch, DevOps Guru), Microsoft Azure (serverless, Azure AD OAuth)
DevOps & Infrastructure	Terraform, Infrastructure as Code (IaC), Docker, GitHub Actions, CI/CD, Linux
Monitoring & Automation	Cloud monitoring, observability, alerting, AIOps, GitHub Copilot
Programming & Scripting	Python, C#, JavaScript, TypeScript, Java (basic)
Development & Integration	.NET, Spring Boot, React, Next.js, REST APIs, Model Context Protocol (MCP), SQL, Jest
AI & Data Tools	AI agents, Jupyter Notebook

PROFESSIONAL EXPERIENCE

Cloud Engineer | Coforge Dec 2024 – Present

- Automated centralized monitoring across multi-account AWS environments using CloudWatch and DevOps Guru, consolidating proactive and reactive insights into a dashboard and improving overall detection effectiveness by 55%.
- Built Terraform-based Infrastructure as Code pipelines to provision monitoring and alerting stacks, reducing manual setup effort.
- Implemented CI/CD workflows for infrastructure and application repositories, incorporating static checks and GitHub Copilot review guidance to improve deployment reliability and identify issues earlier.
- Provisioned serverless AI agents and containerized MCP servers in Azure, integrating Azure AD OAuth to secure organizational access.
- Identified process improvement opportunities through user feedback, proposed innovative solutions, and drove their implementation to improve project efficiency and delivery.

Spark Apprentice | Encora Apr 2024 – Dec 2024

- Developed a REST API using Spring Boot and a single-page application with React/Next.js, delivering an end-to-end feature from specification through deployment.
- Participated in pair programming and code reviews, with focused training in Spring Boot, React, AWS, and generative AI practices.

Full Stack Developer Intern | Xipe Group Jul 2022 – Feb 2024

- Built web and mobile features using .NET-based frameworks, implementing REST APIs and database schemas.
- Collaborated with design, QA, and development teams to translate client requirements into technical specifications and weekly deliverables.

EDUCATION & CERTIFICATIONS

Tec de Monterrey | B.S. in Computer Technologies Engineering

Certifications: Azure Administrator Associate (2026) | AWS Solutions Architect Associate (2025) | AWS Associate Developer (2024) | AWS Partner: Agentic AI Essentials – Training Badge
